

Learn CPR. Save a Life.

High-quality CPR + AED are critical to saving lives. Performing immediate high-quality CPR (including Hands-Only CPR) plus the use of an automated external defibrillator (AED) can double, or even triple, survival rates. With more than 350,000 Out-of-Hospital Cardiac Arrests in the U.S., you have the potential to save thousands of lives.

The American Heart Association (AHA) mission is to train every person in CPR, and we know from experience that our training education products deliver a great foundation for First Aid, CPR & AED training at any level from healthcare professionals to workplaces to schools and community organizations. Let us show you how at www.heart.org/cpr.

HEALTHCARE

Healthcare professional courses are updated to reflect 2020 Guidelines for CPR & ECC and use a personalized adaptive algorithm for the most efficient path to content mastery.
